Evangéline Biboum,
General Manager Human Resource,
MTN Cameroon,
Dear Madam

**LETTER OF APPLICATION FOR INTERNSHIP IN SOFTWARE ENGINEERING
JOB IN MTN CAMEROON**

It is an honor to write to you madam seeking for a software engineering Job in MTN Cameroon. Though MTN Cameroon is a telecommunication company I believe that it requires resourceful Software engineers who can assist in creating amazing user experience for the users of MTN services, as well as develop new products around the MTN brand that will expand its reach in the Cameroonian internet and telecommunication market.

Being an employee I know I can be able to use my experience in user experience and user interface design to work with the development and marketing team to assist in creating appealing software products users will be willing to use. In the process also gaining experience and knowledge from the already existing development team.

As the world is moving from the traditional way of doing things to technologically advanced methods, people are going in the same direction. Being a software developer building tech solutions I have realized that, a

very large percentage of the Cameroonian population are the young people. The demographics which are more easily to adapt to technology in Cameroon are youths between the ages of 18 and 27. I believe that if MTN Cameroon can hire innovative technology experts that can create tech solutions that cater for the needs of young people within this category, it will be a very profitable venture. I am a young person as well and I am passionate about being able to create solutions that can help fellow young people. I know I will be resourceful in providing innovative ideas and products that can make MTN services such as Mobile Money and internet more appealing to members of the said demographics.

MTN Cameroon is a tech giant when it comes to innovation and customer service. I know, Hiring me in addition to the developers in the team will go a long way in improving the company's innovative stamina. I will be very grateful if I am granted this opportunity.

Thank you very much for your keen attention.
